SUMMARY

Odoo Developer with 2+ years maintaining production ERP systems across inventory, sales and reporting. Proficient in Python, PostgreSQL and QWeb; growing into techno-functional ERP consulting.

PROFESSIONAL EXPERIENCE

Odoo Developer 09/2025 – Present
Nikkuttan Associates (SpareMate)

- Develop and maintain custom Odoo addons for a UAE/Oman spare parts ERP, covering inventory, sales, purchase and multi-company reporting.
- Build SQL-based business reports using PostgreSQL, XlsxWriter and QWeb PDF.
- Diagnose and resolve ORM, record-rule and access-control bugs, tracing data visibility failures in a live multi-company environment.
- Optimised ERP query performance by converting selected Odoo ORM operations into direct SQL queries where appropriate.

Jr. ERP Technical Consultant 10/2024 – 09/2025
Datavalley Web Services

- Delivered Odoo eCommerce customisations for a live implementation (carollia.com), including module development, SMS integration, mobile app API and payment gateway integration.
- Participated in client meetings and functional implementations, translating business requirements into Odoo configuration — early exposure to functional consulting workflows.

ERP Consultant Intern 03/2024 – 10/2024
Divergent Catalist Pvt. Ltd.

- Gained practical experience with Odoo development and ERP functional workflows across Sales, Purchase and Inventory modules on real-time implementation projects.
